I'm using firebase 3.2.3 and receiving the push notification just fine. But the problem is, there's no messages showing in the messages screen. I'm assuming the problem is either in the application or the database, cause when i change the application ID and key to match the functions that i made, it works just fine. I'm not sure what to do, so any help would be very appreciated. A: I think the problem was in the apiKey, it was not the correct one. Proper apiKey is @"push.api.production.cosmic.gserviceaccount.com" Thx to @Ushar Patel for this information. Asking for a friend Just a couple of thoughts. This is the south and the poor. We have enough adversity to deal with. But to put our child on that type of play ground is just ridiculous to me. He is 10 months and I am trying to find a mother in the church to take this baby. They all say I have to be in the church and they say with a baby I need church money. But just because a child needs church money does not mean they need to leave the church I say. Why can
