Game Tips and tricks: Of course, before you start playing, there are a few things you should know. ● I. Skill System● II. Character You can run through the story by creating a Character. You can also create a custom character by fusing other characters with different materials. You can easily create a mage or a warrior character, by fusing a warrior and a mage. ● I. Skill System● II. Be wary about monsters There are plenty of monsters that are extremely dangerous, so if you want to avoid death, it will be better if you equip weapons that deal more

damage to monsters. There are also key items called shield stones, which allow you to equip Defense abilities that add buffs to your Defense and Attack. ● IV. Fight! When you face a monster, you will be able to press the button to fight it, and if you kill the monster, you will get EXP. The more EXP you get, the more levels you will be able to unlock. There are monsters with different levels. Level 1 monsters have a high chance to attack with a certain ability. Level 2 monsters have a high chance to attack from range. Level 3 monsters have a high chance to stay back and attack from range, and Level 4 monsters have a high chance to attack without being provoked. This is, of course, applicable to all classes. Note: If a monster is not large enough for you to fight, you can hit it with your bow, if you can kill it with one arrow, you will get EXP. However, the EXP you get from a monster that you fight using your bow will have a probability of dropping your weapon. You will have to lose the bow first, then you will be able to equip a new weapon. It is also easier to fight monsters in a group. ● As a reward for completing tasks, you can increase the Skill Points and the level of each class. There are some monsters in the world that can greatly

help you. ● I. Monster ● II. Bewitching' ✳
Certain monsters offer “Bewitch’ to enhance
your Attack and Defense ability. ● III.
Expending Dragon ✳ Certain monsters offer
