by DevilPig 10-21-07 10:00 AM "Gentlemen, you're all fired! We've had it with your bantering and we want it shut down!!!" Geeze! No one seems to want to take any responsibility for this but "everyone else" is either to blame or just ripping you guys off. What a load of rubbish! SP20 bantering is one of the best ways to get the others to bite off your head on a platter. When have you ever had a SP20 with no bantering going down? I have witnessed far more banters that are every bit as bad as what is allowed under the SP20 rules. You will be hard pressed to find a decent SP20 where: * no one brings up a topic on the list * you don't ask others to respond on the list * you don't invite people to respond to you instead of one of the others If we changed all of our SP rules to be based on these kinds of banters none of them would have a place in the sub. The rules are already complex. Changing them significantly to reflect banters that don't exist is just stupid. One of the reasons some people have posted here is that they think these banters are being conducted by people who are bad forumites. Where are these people coming from? Certainly not from this sub. If someone makes one good point and then continues to ramble on into oblivion and has no interest in listening to the other members it is not fair to punish a thread for it's host's misbehaviour when obviously the host was not aware of it and is a victim. There are plenty of better forums that give equal space to ALL viewpoints even if those viewpoints are wrong. I certainly don't want equal attention on some forums simply because those forums would put them as good as dead. Responsibility for rules or lack of is indeed shared. The most important cause of things being missed is slackness in noisily reminding some officer of moderation that something is still or not in its place. The responsibility should be put solely on the officer's shoulders. The most important cause of things being missed is slackness in noisily reminding some officer of moderation that something is still or not in its place. The responsibility should be put solely on the officer's shoulders. That leaves the officier with the dual responsibility

LegendsofEthernal is an action/adventure puzzle platformer. Seamlessly combine your trusty sword and magic orb to overcome the many dangers in between the depths of the world. Now, follow me into the game. The setting: The game takes place in the world of Lemuria. The Endless Storm rages across the world of Lemuria, bringing with it death and destruction. The Great Forest is lost to the winds of the storm. It lies there, frozen in time, and stands against the winds. During this time of crisis, the world needs heroes. The game features four characters; Narik, Acara, a mysteriously beautiful woman, Kell, a ninja, and a young boy named Verick. The four characters can be equipped with weapons, as well as magical magic orbs that can be customized with different spells. With the help of these characters, players will explore the Earth and fight off the many dangers that stand in between them. The gameplay: Players are able to access the World Map to select where they wish to travel. The World Map includes four different lands that can be accessed – The Forest, the Scrublands, the Swamps, and the Mountain. The lands can be individually explored by moving the character to the World Map, and selecting the area you wish to travel to. Each area can then be expanded upon with the use of the Z button. Combat has returned to a more classic puzzle platforming style, however, there are also some new features that are included as well. Combining characters will allow for a new transformation that can add a shield or improve a sword's attack. Health is represented by a meter and can be depleted by attacking enemies, or being

attacked. While the combat system may feel similar to older Zelda games, there are some new features as well. Transformations can also be altered by the use of the directional pad. The new system will allow players to change the attacks of their character by rotating their attack pattern on the new screen. Players will also be able to control the 'Lightning Arrow' which allows them to move through the world by jumping towards the direction of the lightning. Players will be able to access menus using the 'B' button on the D-Pad. The Lightning Arrow can be used to run through doors that have been locked, or to go up ramps, while the Lightning Shield creates a thin defense for the player. These shields can be
