Installation: 1. Download the product from the link below and the extract files into a folder on your computer. 2. In Dreamweaver find the "Extensions" tab and install the component. 3. Go to the component home page on the tab "HTML5 Vertical Menu" you will find all necessary files for the extension.

Time-Saving and Easy Dreamweaver is one of the best web design and development tools, but with all these elements are easy to use and even more easier to customize. We decided to add a Vertical Menu module to Dreamweaver that adds few elements to the menus that you already can build with the existing tools. HTML5 Vertical Menu DW Extension is a Dreamweaver menu extension that you can use to create a multilevel vertical menu, that is compatible with any browsers. The Vertical Menu extension also works in Dreamweaver CS5, CS4, CS3 and Dreamweaver CS2, so, if you are using any of the previous versions the extension will update without any problems and you can use it with all your existing templates. The Vertical Menu Dreamweaver Extension is a "collapsible" menu that can be set to expand from both top and bottom side. In both cases the menu is available as a slide. When the menu is collapsed it looks like a regular vertical menu. If you set it to expand from the top you have a slide that expands to the right side. If you set it to expand from the bottom side you have a slide that expands to the left side. In both cases you can add HTML code to the panel that is the menu item. It is used to display your own images, text or any HTML code. HTML Vertical Menu is a Dreamweaver menu extension, that you can use to create a multilevel vertical menu, that is compatible with any browsers. The Vertical
