## Sarscape For Envi 5

In your case a multiresolution resizing with a bilinear interpolation is the ideal. A conventional resize like the one in Gimp can change your image scale and not retain any of your high resolution information. In the end it is up to you to decide which one is the best. Edit: I see you tagged this as Python. Here is the code in vincent's answer translated to Python.

```
import numpy as np
def resize_bilin_interp(a, b, n, s=0.8): """ Creates a new array, resized to the same shape as a or b,
where a is resized by a filter that blurs its image by a factor `n` and then interpolates the image by a linear function.
For example: resized = resize_bilin_interp(original, 100, 2) >>> original
[[[0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0]],
[[0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0]],
[[0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0]],
[[0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0], [0.0, 0.0, 0.0, 0.0]]]
```

In my company we have a standard set of services in the.svc,.asmx file. We also have this kind of structure: globalService.asmx ServiceReference1.asmx ServiceReference1.asmx ServiceReference2.asmx

---

ServiceReference2.asmx ServiceReference3.asmx ServiceReference3.asmx  
ServiceReference4.asmx ServiceReference4.asmx ServiceReference5.asmx  
ServiceReference5.asmx ServiceReference6.asmx ServiceReference6.asmx Every time I  
have a problem with a service I check which version we have. The question is - does it  
matter if I get a message from ServiceReference1 or from ServiceReference6? A: It  
doesn't matter, as long as the information and documents for the services are correct.  
The only thing that could possibly matter would be the performance of your services if  
the 6 versions are being loaded and compiled on every call. Since there is a Service1  
and Service6 definition in the.svc file, it will be only that one version that will be loaded  
and invoked unless you specify otherwise (by passing a type to it). Juliet Britton
