What's New in the?

With Zinc v2 Pocket PC Edition, there is no need to develop Windows Mobile Applications using PocketPC Development Tools. Zinc uses the SWF/EXE format, a standard that allows you to compile for Windows Mobile Pocket PCs the same way you compile for any other Windows PC, including your PowerBook! You'll need to purchase {mdm}Zinc to compile your projects! ☐ Zinc v2 Pocket PC Edition is 100% compatible with all existing Pocket PC Development Kit Projects that use {mdm}Flash. Your existing application source code will compile directly onto a Windows Mobile Zinc v2 Pocket PC in less than 30 seconds! ☐ Zinc v2 Pocket PC Edition supports over 150 of {mdm}script commands! ☐ This product includes a brand new include file, Win32RePd, that adds support for the latest Windows SDK for Windows Mobile 2003! ☐ You can compile for Pocket PCs from your Mac OSX Applications without ever leaving the Mac. ☐ Zinc v2 Pocket PC Edition includes a variety of additional features: ☐ - Splash screens ☐ - Installing Applications from a CD-ROM ☐ - Creating Installers that can be used on-the-fly ☐ - Support for Windows Mobile 2K3 with {mdm}Script Commands! This is great!! sunny 3/26/2005 10:46:45 AM I have got this and i love it. this is a great product. i dont know why people are complaining it has good features and the price is well worth it. The best Gerald Tietje 3/26/2005 10:35:27 AM I must first say THANK YOU! I've been looking for something like this for a long, long time and the price was right so I downloaded it with great expectations. Unfortunately it is the worst piece of software I've ever used. It doesn't even keep the flash files which I thought was very annoying, but the worst thing is that I am forced to use windows because of this. I found the drag and drop functionality much better. The compiler itself is awful, it doesn't allow you to "script" at all and the options are just crappy. If you want to make a pocket pc application you should use pocket pc development tools, if you want to

System Requirements:

Supported OS: - Windows XP, Vista, 7, 8, 10, Linux (64-bit only), Mac OS X (64-bit only) - Support for 64-bit is recommended, especially for high-end machines Minimum Requirements: - DirectX 9 or OpenGL - A NVIDIA graphics card with
