• Levels are divided in 7 distinct environments, each one having it's own challenge, rewards and patterns to be found. • Over 270 Quadrillion possibilities to build, train and compete. • All Ai's are built on the same rules and they are the same size and strength and every Ai can train itself every day. • Ai's have an average self training effectiveness (S.T.E.F.) of 30% that needs to be perfected to compete against the other Ai's and be the best trainer. • Ai's are rewarded when they achieve higher scores in challenges and they will be punished when they are performing badly. • Ai's have 10 different statistics that they may improve by training themselves in the different environments. • Ai's are trained through daily training sessions. • You can train your Ai using different strategies according to each challenge. About Aivolution: Aivolution is an Ai training simulator in which you create, train and compete an Ai in seven different environments. This will provide you with a full and fun introduction into Artificial Intelligence and Machine Learning. Ai's will learn from day to day through self training. In a world where every Ai is built on the same rules and they are the same size and strength, you will be required to use different strategies to train them to succeed in a variety of environments, each with its own challenge. You will be provided with Aivolution, the core Ai simulation, where you can customise every aspect of your training and performance. Your Ai will train itself daily. Their training effectiveness will depend on a number of different variables, such as their hunger, the environment they are training in, their level of overtraining and their health. Each Ai will start off with 10 Stats that could improve with their training. You will be asked to improve these stats using their daily training sessions. While you are playing, you will be rewarded with golden sneakers if you have beaten every game. If you have a good score on every level, you will be able to unlock "The Halls of Testimony" wh

Platformer Direct X This is the third time we have played this game. It's a fun game. Played on Windows 7 Pro, Windows XP and Windows Vista Inventory is kind of a pain. Sometimes a question for the author could be Can you move from one screen to another screen (like a house or a garage) without walking? The first time we played, the game was very linear. If the question was answered we could proceed with our story. We are waiting for the second time, we will do the same. Add your reviews Add yo

About This Game: Cyber Gadgets is a turn-based real-time strategy game for the Japanese PC. It is published by Bandai Co., Ltd. The player is Sanjuro Makabe, the pilot of a giant robot called the MCA. The objective is to kill the leader of the rebels known as The Fallen with this robot. The game takes place on both the planet Cronus and on the giant space ship Leviathan. The two are connected by a wormhole and the trail of destruction is left by any carrier crafts that move between them. Your only means of transport will be your MCA. The MCA is a giant mechanoid, ranging from a humanoid form to a tank-like form and everything in between. The MCA can transform itself from a humanoid form into a tank. It can do this by destroying the ground around it. The process is slow, so it will not be possible to completely transform at once. In the tank form, the MCA can run at high speed and strafe very easily. It is also protected from enemy fire. You will use the tank form when fighting in the open and when traveling between planets. You will use the humanoid form to fight in cover. The MCA will start off with the standard equipment available to pilots of other mobile suits. You will be able to upgrade these and build up your suit. Features: • An anime-influenced graphics and style. • Two game modes - single player or two-player co-operative. • Two unique game worlds - battle a pilot armed with a traditional Japanese sword or take the role of a pilot armed with a minigun to fight your enemy. • High-tech weapons, armor and support systems • Ability to build your own MCA

and upgrade it with weapon and armor parts. • Fight the battles on the ground or in space on the battleship. • Use an array of combat vehicles and tanks • Unique storyline with two possible endings. • You play as the pilot of a giant robot. • A combination of science fiction, strategy and action. • A high-tech campaign game. • Unique gameplay action with a distinctive style and flavor. • A heavy emphasis on strategy. • High quality anime-influenced graphics. • Excellent music. • Unique puzzles to solve. • And much more!
