Keymacro is a small utility application that allows you to easily program your keyboard macros using a GUI. Features: Keymacro enables you to easily write keyboard macro codes. The program performs macros recording while the active window is active. It means that you may record the actions you perform with any other window (or when you are not even in front of your keyboard). When you want to see the result of your macro, click on the command button (pressing the CTRL + Alt keys simultaneously). You may create and record keyboard macros on any active window, such as MS Word, MS Excel, MS PowerPoint, Outlook, Internet Explorer, Notepad, etc. With just a few clicks, you may define the position and dimension of the active window where you want to record your macro (e.g. window size, text and format, link to file, style, as well as others). Moreover, you may choose a background color and apply an image to your active window. Keymacro can make you save, load, and edit macros by simply double-clicking a file. A small icon will be displayed at the right corner of the active window. Click it in order to see the keyboard instructions, and click on it again to hide the instructions. The functionality is the same as when you click the button ‘View Macro’ in the toolbar. Besides, you may also record keyboard macros on the current document, and then switch to another document to continue working. You may record macro on the active document (in which case, any other active document will automatically close). When a macro is running, the button ‘Stop Macro’ is available. With just a few clicks, you may start, stop, save, load, edit, and delete a macro. You may also define that each keyboard command must be followed by a pause of at least 10 seconds. Moreover, each macro can be run independently. You may assign a specific shortcut to run a macro, as well as modify a macro’s function. Finally, you may export/import your macros in the following formats: txt, xls, xlsx, doc, docx, rtf, wri, mht, ods, odt, odp. Description: Gadu-Gadu, whose name translates to "hello" in the Hindi language, is a cross-platform instant messaging application with a multitude of social networking features. It was developed by Akshay Rathi of Mumbai, India. The app comes equipped with several basic functions, such as easy text and voice messaging, group chats, presence information (people's online status), and user profiles (mainly for friends). Gadu-Gadu users can send images (mainly, their profile pictures) and emojis (by tapping on the keyboard or using specific controls), and can upload up to 30MB of data. You can share the file via multiple social networks, and Gadu-Gadu lets you use Facebook, LinkedIn, Twitter, V Kontakte, Orkut, Telegram, Imgur, and Line. In order to protect user's privacy, the program only stores the conversations in the database. Gadu-Gadu offers users the possibility of taking a snapshot of their desktop and getting a QR code for a lost phone. The QR code may be scanned with a phone, which, in turn, takes the user to the application's desktop. Additionally, you may add Gadu-Gadu contacts via the web, search the phonebook, and access live chat, a music player, and a photo gallery. Moreover, the app supports offline messaging for those who have a data connection available and do not want to be connected to a server all the time. Gadu-Gadu also lets you send invitations, send files, and start group chats. It also facilitates phone calls via the internet, as well as offline calls. You can configure it to display the user's phone number or its nickname. When it comes to Gadu-Gadu servers, the program supports Jabber, XMPP, and GTalk, as well as Facebook and Twitter. Gadu-Gadu is preloaded on smartphones, such as the Samsung Galaxy S8, Galaxy S8 Plus, Galaxy S9, and Galaxy Note 8. Gadu-Gadu for Android lets you send images and emojis, as well as add friends and share content from the web. It comes equipped with several basic features and a few advanced ones, and you can customize the main settings to meet your needs. Description: Pilot View is a simple free
