Adobe Photoshop Lightroom Classic CC is one of my favorite desktop photography applications not just because of its reputation for being a professional's choice, but also because of the iOS app built on it. Again, it's why it recently made the jump to Creative Cloud. The workflow in Lightroom CC on iOS has been a brilliant philosophy of work that even Apple copies in their Portrait photo editing: **Sunset Portrait** You can make adjustments as you don't yet have a full version of the program. Among the things you can do is copy and paste and trim selections. But the real deal is that you can adjust brushes and pens and also set better values for these things. Fresh and new brushes can be given strong values. If you have a \$2500.00 budget for a single brush, you may not need to use the old and crummy brushes left to you by the software's angle at making your own brushes. This is a true bonus for beginners.
